INSTITUTE
Awards

MOLECULES IN SPACE

SYMPOSIUM IN HONOR OF
ALEXANDER DALGARNO

Recipient of the 2013 Benjamin Franklin
Medal in Physics

When: Wednesday, April 24, 2013
2:00 PM—4:50 PM

Where: Trabant Theater at Trabant Student Center
University of Delaware
17 West Main Street
Newark, DE 19716

Speakers: **David Neufeld** (Johns Hopkins): “*Small Interstellar Molecules and What They Tell Us*”

Eric Herbst (U. Virginia): “*Organic Molecules in Star-Forming Regions*”

Tom Hartquist (U. Leeds): “*Molecules in Astrophysical Accretion – From Protoplanetary Discs to Clusters of Galaxies*”

Alex Dalgarno (Harvard): “*The Growth of Molecular Complexity in the Universe*”

Price: Free and open to the public

COLLEGE OF ARTS & SCIENCES

DEPARTMENT OF
Physics and Astronomy

*Awards Week is generously underwritten by
Mrs. Frank Baldino, Jr.*

This event is presented as part of
The Philadelphia Science Festival

The Franklin Institute Awards Week and the
Philadelphia Science Festival are organized by

 **THE FRANKLIN INSTITUTE**

For 189 years, The Franklin Institute has honored the greatest minds in science, engineering, technology, and business. The Franklin Institute Awards are amongst the oldest and most prestigious comprehensive science awards in the world. Recognizing these brilliant men and women from around the world is one important way that the Institute preserves Benjamin Franklin's legacy. They are the Franklins of today; they will inspire the Franklins of tomorrow.
